

Yissum,
the Hebrew
University's Tech
Transfer Company,
is the bridge for
trailblazing research
to the wider market
across the world.

Our team is dedicated to supporting leading researchers and their cutting-edge technology. We are committed to developing the right strategies, finding the right partners, and creating the right opportunities for academia's best minds to succeed in the marketplace.

Founded in 1964, as the third Tech Transfer in the world, Yissum provides unparalleled experience and passion to commercialize innovation for global impact. Together with the university's outstanding scientists and collaborations with industry leaders, we provide a platform for technology commercialization, corporate engagement, and economic development.
